

## Homework Summer 1st Half Term

As teachers are wanting to set maths and literacy homework tasks with different individual class approaches we have reduced the optional homework grids so that there are only 8 tasks; four relating to the class topic and four linked to the Personal, Social and Moral theme.

<p><b>Reading.</b> Remember reading is probably the most important homework you can do. Try and read every night even if it is just for 10 minutes. Sometimes it is also nice to have stories read to you (these count in your termly total).</p> <p><b>My Target is:</b></p> <p><b>Termly Total.</b> This half term I have read these books:</p>				
<p><b>Personal Moral Spiritual</b></p> <p><b>Footprints</b></p> 	<p>Top Trumps.</p> <p>Most of us have played top trumps and most of us have a fascination with certain types of plants or animals. (I love birds of prey). Use the templates your teachers have to create a set of top trumps cards – you could draw the pictures but you are also welcome to use the internet and the school printer to create images. Ask parents or teachers to help you think of criteria to score them against and you will soon have your own game!</p>	<p>A special place to be in nature.</p> <p>For many of us there are places where we feel we can connect with nature. As a school we visit three such locations regularly. This task is to choose one of those places or one of your own and create a group of photographs to show different aspects of the place. Maddy has already produced one for Gwithian beach and you can look at it on the Outdoor Learning display for ideas. It can be a big area, I am going to try and make one for the Lake District, or just a patch of wildness in your garden. Happy snapping.</p>	<p>Recycle and reuse.</p> <p>It is good to put rubbish that can be recycled in special bags rather than in the general waste bin but it can be even better to recycle and/or reuse things yourself. You can turn old boxes into musical instruments, old plastic containers into toys or bird feeders. There are hundreds of ideas on the internet – what is the most creative way you can turn waste into a new product.</p>	<p>Change the world.</p> <p>During this unit we will be thinking about all the ways humans can damage the world they live in and also how we can make a positive difference with the right actions. Choose one element e.g. electricity saving, driving less, recycling and create a poster to make people start acting differently.</p>

<p><b>Our Topic</b></p> <p><b>‘Planet Earth’</b></p>	<p>Find three things that you have to buy in a plastic bottle. Design an alternative way of packaging the product that does not involve plastic. For example, you might want to buy hair shampoo in a glass jar that you can refill.</p>	<p>Find three things that have the recycling sign on them.</p>  <div style="border: 1px solid black; padding: 5px; width: fit-content;"> <p>Find out what they mean. Can you recycle them or re use them?</p> </div>	<p>Draw your favourite animal. You might want to draw it on its own or in a landscape. Make a note of why it is your favourite animal: is it because it is a great hunter, cool swimmer or looks amazing? We want to know and see your artwork!</p>	<p>Design a menu that has totally fresh ingredients you could grow yourself, in a garden, allotment or a neighbour’s veggie patch (cheeky!) . That way it won’t have packaging or transport costs. What would you use in the dish?</p>
