Dear Parents, Carers and Children

Another week sees another milestone passed in the form of Godrevy's residential at Carnyorth. As usual the children had a fantastic time and came back tired but with many exciting stories to tell. It went virtually without a hiccup although one poor member of the class couldn't go and another had to be picked up due to sickness; we thought we'd got away with it this year and even cancelled transition to try and avoid contamination after Busy Bodies had to close at the beginning of the week. We are keeping fingers crossed and touching all wood available in the hope that it won't interfere with any of the other planned activities at the end of term. We are also keeping fingers crossed that the high winds that we are currently experiencing will abate for next week for Poldhu's activity days and sleepover as we hope to pitch our new tents at the back of the school. If winds are high we will still go ahead with the sleepover but it will be in the hall rather than the tents which wouldn't be quite the same. The high winds have been accompanied with bright blue skies which has been nice although it has meant that our latest feature in the school grounds has not been able to fire imaginations as much as we would have liked for it's first week. Despite this, children have still enjoyed laying on their backs in the cloud viewing chamber and looking up at the blue yonder.

It is now Friday and we are hoping the winds will ease for the Summer Fayre. I have just seen half of the performance and it is already taking shape and I think it will be a very entertaining and hilarious spectacle – remember there is a horror theme and if you are in the audience you are encouraged to join in with a little bit of fancy dress – not full on Rocky Horror Picture Show outfits though! I will now sign off early, for a change, as we are expecting some other performers from Palores Productions who are here to entertain and educate our older children with their show The Cornish Caretaker. It should be a great end to a busy week. I hope you all have a restful weekend - I am sure Mrs Drelinga and Miss Shaw will and I will finish with a big thank you to them both for many extra hours to make camp such a success.

SCIENCE FACT

Is helium lighter than air?

Last weeks answer: Butterflies taste with their feet as their taste sensors are located there. They can taste it by just standing on their food. They don't have mouths that allow them to bite or chew, instead they have a long straw-like structure called a proboscis which they use to drink nectar and juices.

Another 24—from Mrs Haddy

As you are all getting so good at this we have decided to make things more challenging by including problems with 2 digits in them. The rules are still the same you must use all 4 numbers but you can only use each one once.

There is at least 1 solution can you find more?
